TRAINING PROGRAM

2-Week System Training

A role-by-role program to take every member of staff from new to confident in two weeks.

Program	**2 weeks (10 working days)**
Format	**Daily: common session + track session**
Audience	**All roles**
Version	**1.0**
Date	**05/10/2026**
Prepared by	**EnglesTech Plc**

Every participant leaves able to do their own job in the system, and read the manual for anything else.

PROGRAM

How the two weeks work

Each of the ten days has two blocks. The morning block is shared by everyone, or by the roles that need it, and covers a topic the whole school depends on. The afternoon block is a track session where each role learns the screens it actually uses.

The daily shape

Block	Who	What happens
Morning · 8:30–10:30	Whole school or a named track	One topic, taught the same way to everyone, with a live demonstration on the system.
Afternoon · 10:45–12:15	Role tracks	Each role learns its own screens and workflows, with practice on real data.

What everyone gets, every day

- A live demonstration before any hands-on work — watch once, then do.
- Practice on real school data rather than a sandbox, because that is where the learning transfers.
- The in-app User Manual and the printed manual open on the same device, used as the reference.
- A short end-of-day check that the day’s outcome was achieved.

Who teaches

- The Administrator or a nominated Owner opens each day and keeps time.
- The subject owner for that block leads the hands-on: HR for people, Finance for money, the Principal for academics, the Librarian for the library, Operations/Security for the registers.
- Every participant signs in with their own account — never a shared login.

> If a session runs over, protect the afternoon track block. The morning common sessions can be trimmed to the headline points, but each role must get its own hands-on time.

DAY BY DAY

The ten days

Day 1 — Orientation & sign-in

Whole school · 8:30–10:30

What the system is for, and how it is organised
The five structures everyone depends on: academic year and terms, levels/classes/sections, roles and permissions, active vs archived, and scope levels. Show the dashboard each role sees on arrival.

Whole school · 10:45–12:15

Hands-on: sign in, find things, read the menu
Everyone signs in with their own account. Find the menu, use search, switch language, and open the in-app User Manual from the sidebar.

Outcome: Each participant can sign in and navigate their own role.

Day 2 — Students, classes & the academic structure

Admin · 8:30–10:30

Registering a student end to end
Students !' Add Student: names, guardian phones, class and section. Then the Parents screen — guardians matched by phone, and the Unlinked Students list to link or create a guardian.

All tracks · 10:45–12:15

Classes, subjects, homeroom, timetable
How a class is created and what depends on it: subject assignment, homeroom teacher, timetable slots, exams and attendance. Roster drill-down on the Classes screen.

Outcome: A new student is registered, correctly placed, and guardian issues resolved.

Day 3 — Attendance & academic records

Teacher track · 8:30–10:30

Daily attendance and entering marks
Marking a class Present/Late/Absent with bulk actions, then creating an exam, setting the total, and entering marks. Where results appear afterwards.

Admin/Academics + HR · 10:45–12:15

Staff attendance, leave and the weekly grid
HR demonstrates the daily summary, the weekly grid and period statistics. Show the deduction settings and how leave approvals flow into availability.

Outcome: Teachers mark attendance and enter marks; HR can complete a week of staff attendance.

Day 4 — Results, report cards & quality

Academics · 8:30–10:30

Report cards, KPIs and quality assurance
Producing a term report card, reading the aggregation (subject %, letter, overall, GPA), and running teacher KPI reviews with automatic sources and reviewer overrides. The Quality Assurance screen.

Whole school · 10:45–12:15

Exercise: run a term end-to-end
Each track completes its own term-close tasks: teacher submits marks, HR finalises attendance, admin checks the class result view.

Outcome: A full term of attendance and marks is closed and report cards generate.

Day 5 — Fees, payments & the front desk

Finance/Cashier · 8:30–10:30

Fee structures, billing and taking payments
Defining fee structures per grade, running monthly billing, recording a payment, and reading outstanding balances. Cashier runs the Enroll wizard at the counter.

Finance · 10:45–12:15

Reconciliation and collection reporting
The Accountant Portal reconciliation view, collection report by method and class, and the outstanding balances ageing sheet.

Outcome: A month can be billed, a payment taken, and the position reported.

Day 6 — Payroll, tax & overtime

Finance · 8:30–10:30

Running payroll with auto-calculations
Salary Register !’ payroll. Calculate: income tax from the brackets, employee/employer pension, and the attendance deduction. Post the run and read the Payroll Audit trail.

HR + Finance · 10:45–12:15

Overtime and how it reaches payroll
Recording overtime, the multipliers (day 1.5×, night 1.75×, rest day 2×, holiday 2.5×), auto type-detection, approval, and the automatic pickup into payroll. Adjust the settings live.

Outcome: A payroll run posts correctly with overtime and deductions included.

Day 7 — Library, assets & operations

Librarian + Operations · 8:30–10:30

Library: catalogue, loans, transactions, inventory
Add titles and copies, issue and return, find an overdue loan in Transactions, and run Book Assessment + Inventory to reconcile stock.

Operations + Security · 10:45–12:15

Assets, the Security Hub and shifts
Asset register with codes and status; visitors, incidents and gate passes; the Shift Hub duty roster and substitutions tied to the timetable.

Outcome: A book is issued and returned; an asset and a visitor are logged.

Day 8 — Reporting & sharing

Whole school · 8:30–10:30

The report center and what each role sees
Tour the catalogue role by role. Demonstrate the multi-sheet HR workbook (Staff, Leave, Staff Attendance, Overtime) and the per-class student sheets.

Whole school · 10:45–12:15

Exports, share links and privacy
Excel/CSV/PDF/print exports; creating a share link with an expiry; aggregate-only vs named lists; revoking a link. Emphasise that a shared link is public.

Outcome: Each participant exports the report their role uses and shares it safely.

Day 9 — Administration, permissions & data

Owner/Admin · 8:30–10:30

Users, roles and permissions
Creating users, assigning roles, reviewing permissions per role, resetting passwords, and archiving vs deleting. Discuss least-privilege practice.

Owner/Admin · 10:45–12:15

Import, backup, settings and audit
Bulk import with validation, taking and storing a backup, key settings, and reading the Audit Logs. Practise a backup + a role review.

Outcome: A backup is taken and stored; a role is reviewed and tightened.

Day 10 — Practice, assessment & sign-off

Whole school · 8:30–10:30

Guided practice: each role runs its real work
Every role completes its own core workflow on live data with an administrator circulating. Use the Troubleshooting table in the manual as the reference.

All · 10:45–12:15	**Assessment, feedback and next steps** Short practical assessment per role, group feedback, a question sweep, and agree what each role will own going forward. Sign-off sheet completed. *Outcome: Every participant is signed off as competent in their own role.*

ROLE TRACKS

What each role attends

Use this to confirm, before the program starts, that everyone can attend the sessions their role depends on. A role marked for a day attends both that day's common content and its own track block.

Role	Days	Focus for this role
Teacher	D1 · D3 · D4 · D8 · D10	Focus on attendance, marks, report cards, timetable, My Teaching report and the student/parent views they will be asked about.
Administrator	D1 · D2 · D3 · D4 · D5 · D8 · D9 · D10	Owns nearly every screen; attend all finance and HR sessions as the person who keeps the school running.
School Owner	D1 · D2 · D8 · D9 · D10	Oversight: structure, reporting, permissions and backups rather than daily entry.
General Manager	D1 · D8 · D9 · D10	Executive dashboard, report reading, share links and audit.
Principal	D1 · D2 · D3 · D4 · D8 · D10	Quality assurance, teacher KPIs, discipline, scoped reporting.
Vice Principal	D1 · D2 · D3 · D4 · D8 · D10	As Principal plus the Shift Hub and coverage.
Quality Director	D1 · D2 · D3 · D4 · D8 · D10	Teacher KPI reviews and cross-level quality reporting.
HR Officer	D1 · D3 · D6 · D9 · D10	Staff attendance, leave, overtime and the HR reports; supplies payroll inputs.
Finance Officer	D1 · D5 · D6 · D8 · D10	Fees, payments, payroll, tax, overtime payment and reconciliation.
Accountant	D1 · D5 · D6 · D8 · D10	As Finance plus the reconciliation portal.
Cashier	D1 · D2 · D5 · D10	Enrolment at the counter, taking payments, end-of-day reconciliation.
Librarian	D1 · D7 · D8 · D10	Catalogue, loans, transactions and inventory.
General Services	D1 · D7 · D8 · D10	Assets, operations and expenses; library as a service.
Security Head	D1 · D7 · D8 · D10	Visitors, incidents, gate passes and the Security report.

Shift Coordinator	D1 · D7 · D8 · D10	Duty roster, coverage and substitutions.
Student	D1 · D8 · D10	My Timetable, My Progress and My Library.
Parent	D1 · D8 · D10	My Children, results, attendance and fee position; finding a guardian account.

ASSESSMENT

Sign-off by role

On day 10 each participant completes one practical task in their own role. It is marked pass/fail against the evidence column, and a short written feedback box is completed by the trainer.

Role	Practical task	Evidence that it is correct
Admin	Register a new student with a guardian, place them in a class, and produce the class roster.	Student appears on the roster; guardian linked on the Parents screen.
Teacher	Mark a full week of attendance for one class and enter marks for a subject exam.	Attendance saved; marks aggregate to a subject percentage and letter grade.
Finance	Bill the month, record a payment, and calculate (not post) one payroll run.	Balance reduces on payment; payroll shows tax, pension, deductions and approved overtime.
HR	Fill a week of staff attendance on the grid, approve a leave request, and add an overtime entry.	Week complete; leave appears as unavailable; overtime priced at the right multiplier.
Librarian	Add a title, issue it to a student, return it, and run a stock reconciliation.	Copy count restored; discrepancy recorded with a reason.
Principal / QD	Open Quality Assurance, review flagged teachers, and publish a KPI period.	Reviews completed; ratings feed the quality screen.
Owner / GM	Export the Staff & HR workbook and share a report with an expiry.	Workbook has the expected sheets; shared link opens and expires.
Security / Ops	Log a visitor, raise an incident, and issue a gate pass.	All three registers populated and exportable.

Sign-off

Participant	Role	Tasks passed	Trainer	Date

> Keep completed sign-off sheets with the training record. They are the evidence that each person can operate their part of the system before they are given live responsibility.

BEFORE DAY 1

Preparation checklist

Two weeks is short. These items, done in the week before the program, are what make it work.

1. Confirm every participant has a user account with the correct role, and that they have signed in at least once.
2. Print or share the User Manual and this program with all participants on day 0.
3. Choose and brief the trainers for each block — HR, Finance, Principal, Librarian, Operations.
4. Agree the practice data for day 10 so that real work gets done, not duplicated.
5. Schedule the daily rooms/links and protect the two blocks from interruption.
6. Prepare one backup before the program and know how to restore it.
7. Publish the role-day table (page 4) to participants so nobody misses a session they need.
8. Agree the pass mark and who signs off, so day 10 ends with a clear decision for every person.
